West Virginia

We are excited to announce the construction of CMC’s fourth state-of-the-art micro mill in Berkeley County. Micro mills use 100% recycled steel to produce new material and are among the most environmentally friendly steelmaking operations in the world.

**$450 MILLION**
net capital investment

**$715,840,000**
annual impact of operations

10-year Total Economic Impact: **$7.5 BILLION**

**65% FEWER CO₂**
emissions from EAF mill than industry average

**81% LESS**
less energy used than industry average

**96% LESS**
water consumed than industry average

**100%**
recycled steel used to make new products
CMC Steel West Virginia will produce both spooled and straight rebar that is used to reinforce concrete in buildings, bridges, roads and infrastructure.

**KEY DATES**

- **construction start**: MID 2023
- **mill start-up**: LATE 2025

We’re Commercial Metals Company — CMC, for short. You’ll find our steel in sports stadiums and public buildings as well as highways, bridges, railways and other structures nearly everywhere on the planet.

To serve this global market, CMC maintains facilities across the United States, Europe and Asia. These sites include everything from local recycling centers, steel mini-mills and micro-mills to large-scale fabrication centers, heat-treating facilities and other metals-related operations.
