HUMAN TRAFFICKING

Human trafficking is a form of modern-day slavery in which traffickers use force, fraud, or coercion to control victims for the purpose of engaging in commercial sex acts or labor services against their will.

Millions of people are trafficked annually worldwide and victims can be any age, gender, nationality, or race, and can come from any socioeconomic class. Human trafficking is not just an international issue — it occurs in all states and U.S. territories, including West Virginia.

The West Virginia Fusion Center (WVFC), in collaboration with other organizations and local, state, and federal law enforcement is committed to identifying potential victims of human trafficking and linking them to crucial services and to providing free training and resources to partner agencies.
